WINTER TYRES CARD

Indicates the ideal outside temperature for fitting and maintaining winter tyres.

Winter tires should be fitted when the temperature is less than or equal to 7° C for a few consecutive days.

cut along the dotted line

The tread depth of the winter tyres should be constantly checked and the tyres replaced when it reaches 4 mm.

Warning less than 4 mm

Over 4 mm

Outside temperature indicator.
Remove it from the support and apply it on the outside rearview mirror of the car after cleaning it, taking care not to block the rear view.
If the indicator turns green and shows the message OK, the outside temperature is less than or equal to 7° C. Fit the winter tyres!
